

DENTAL CARE BONES

For medium and large dogs

-  Reducing Plaque
-  Preventing Tartar
-  Treating Bad Breath

Many dogs and cats suffer from problems related to oral health. Good oral health is important to their wellbeing. It's about creating healthy habits for oral care right from the start. ProDen PlaqueOff System® helps to prevent bad breath and clean teeth for dogs and cats throughout their life- from a small puppy or kitten, all the way to senior age.

ProDen PlaqueOff System® Dental Care Bones
ProDen PlaqueOff System™ Dental Care Bones have the unique ProDen PlaqueOff System™ which is based on a sea kelp from the North Atlantic outside the coast of Norway, beyond the Arctic Circle, one of the purest habitats on the planet. The kelp is harvested following a strict process to preserve its quality, with tools and technologies that leave the environment completely unchanged. ProDen PlaqueOff System® Dental Care Bones are approved by the VOHC (Veterinary Oral Health Council).

How ProDen PlaqueOff System® Dental Care Bones Work:

ProDen PlaqueOff System™ Dental Care Bones help prevent plaque formation, the bones unique shape helps to remove plaque and tartar with natural chewing action and also helps to freshen breath.

Results:

The results - in the form of visibly whiter, cleaner teeth and fresher breath - are usually seen in three to eight weeks with continued use. The effect can be seen as long as the products are being used. Our Dental Care Bones can be used daily with ProDen PlaqueOff® Powder or on their own.
