

-  Reducing Plaque
-  Preventing Tartar
-  Treating Bad Breath

Many dogs and cats suffer from problems related to oral health. Good oral health is important to their wellbeing. It's about creating healthy habits for oral care right from the start. ProDen PlaqueOff System® helps to prevent bad breath and clean teeth for dogs and cats throughout their life- from a small puppy or kitten, all the way to senior age.

### ProDen PlaqueOff System® Holistic Soft Bites

A delicious new way to supplement your daily oral care routine! These new functional treats are a soft edition to our popular and growing brand of your favorite ProDen PlaqueOff® family.

### How ProDen PlaqueOff System® Holistic Soft Bites Work:

ProDen PlaqueOff System™ Holistic Soft Bites help prevent plaque formation and also helps to freshen breath. Each formulation has additional benefits for your pet including Gut & Immune Support, Hip & Joint and a Puppy formulation with DHA. Our Holistic Soft Bites, for the best results, can be used daily with ProDen PlaqueOff® Powder or on their own.

#### Results:

The results - in the form of visibly whiter, cleaner teeth and fresher breath - are usually seen in three to eight weeks with continued use. The effect can be seen as long as the products are being used. Our Dental Care Bones can be used daily with ProDen PlaqueOff® Powder or on their own.
