From: Martin Shimko - President
James Garcia - Chief Commercial Officer

Dear Distribution and Direct Retail Partner,

Recently, we have had questions relative to what we have established as our pricing strata and policy in the marketplace. The below grid reflects what we deem as our official pricing strategy for our retail partners in pet specialty.

We have two prices. One is our manufacturers suggested price, the second is our minimum advertised price which can be found on page 2 of this agreement.

Special promotional offers intended as an incentive for retail placement, must reflect this pricing as (MAP) and is established to provide everyone visibility and direction on a daily and ongoing basis.

For the benefit of everyone selling ProDen PlaqueOff® we reserve the right and will enforce restriction of our products from being sold to E commerce websites that are not agreed to between us prior to sale. Our expectation is that our distribution and direct retail partners will assist and control this policy, and all other promotional or posted activity that does not reflect our mutual efforts. We need to ensure our products offered on websites are valid products, produced by us and distributed by our authorized or direct retailers.

We will work with you on a one by one basis to identify and correct unauthorized sales, and provide you time to apply corrective action. These can be identified as sales directly to E commerce sites, or sales by your specific retailer posted on that site. We will also restrict sales to retailers out our trade class, meaning FDM or other non pet specialty trade class type retailers.

We will first report any retailer not in compliance to you for corrective action. You can verify sales from your sales records. In addition, if any questions relative to origin of sale arise, we have an internal tracking method applied to each product we can acquire and then check who sold it.

We will allow ten days from date of notification for you to apply corrective action, and upon further violation may result in restriction of future sales to you.

We appreciate your efforts and attention relative to this important policy.
